

DEFENSIBLE SPACE GUIDELINES

The following can make your home safer from embers and radiant heat:

- Clean roofs & gutters of dead leaves, debris and pine needles that could catch embers.
- Replace or repair any loose or missing shingles or roof tiles to prevent ember penetration.
- Enclose under-eave and soffit vents or screen with metal mesh to prevent ember entry.
- Cover exterior attic vents with metal wire mesh no larger than 1/8 inch to prevent sparks from entering the home.
- Repair or replace damaged or loose window screens and any broken windows.
- Screen or box-in areas below patios and decks with wire mesh to prevent debris and combustible materials from accumulating.
- Move any flammable material away from wall exteriors - mulch, flammable plants, leaves and needles, firewood piles - anything that can burn.
- Remove anything stored underneath decks or porches.
